

Scheduler Tools

As we saw in Module 7, classes with multiple meeting patterns are represented as "segments" in 25Live. Another way to associate events is creating sets of related events. For example, consider a related set of events associated with a conference.

One method to set up related events is to create the initial event, copy it as a part of a related set, change the necessary parameters, and save.

If the event repeats using the same time but different dates and / or locations, best practice is to create only one event. If *times* change across dates, or if you want to give each event a different name, using related events is the better approach.

Copying Events

Start by creating an initial event for our fictitious *Faculty Poetry Series*¹¹.

1. Create an event using **Event Form**. Enter name, title, event type,¹² organization, head count, date(s), time, location, ERP items. Save.

The screenshot shows the 25Live Event Form for an event titled "Walt Whitman - a perspective". The event is confirmed and scheduled for Monday, October 11, 2021, from 7:00 pm to 9:00 pm at location GSHG64. The form includes tabs for Details, Occurrences, Calendar, Task List, Pricing, and Audit Trail. The Details tab is active, showing the General section with fields for Event Name, Event Title, Event Type, Organization, and Scheduler. The Event Categories and Custom Attributes sections are also visible. The Event Occurrences section at the bottom shows a table with one occurrence on Mon Oct 11 2021 from 7:00 pm to 9:00 pm at GSHG64.

Date	Start Time	End Time	Additional Details
Mon Oct 11 2021	7:00 pm	9:00 pm	GSHG64

¹¹ If you are copying an event that has Event Activities and Features set to the affirmative, be sure to reset them as appropriate.

¹² A couple of special Event Types are available to those who create conference events or large events such as "Reunions" or "Graduation". Additional training is offered on how to create these events.

- To create a second event for the "Mark Twain's Lesser Known Poems" that runs from 7:30 to 9:00 PM on either Thursday or Friday, start by selecting **Copy Event** – an option under **More Actions**

Walt Whitman - a perspective ☆ Confirmed 2021-AAKJZM Mon Oct 11 2021 7:00 pm - 9:00 pm GSHG64

Cancelling Events

Cancelled

Tentative

Confirmed

Cancelled

When an event needs to be cancelled, any scheduler can set the status to cancelled. Cancelling an event should be in coordination and communication with other interested parties.

Saving an event in the Cancelled state releases any location and resource assignments. Only users with the required security permissions may edit an event that has been cancelled.

OKCancel

If an event is part of a set of related events **only** the event marked as cancelled is cancelled. All others maintain their original state and all remain in the set of Related Events.

Audit Trail

As work is performed on events an "audit trail" is built and saved in 25Live. If you need to verify when a particular task was completed and by whom, you can check the Audit Trail for details. One example is when emails were sent. The contents of the emails are not preserved here which is one reason you should be copied on all outgoing emails.

To access the event history, open event **Details** and click on **Audit Trail**

To Do Items

Additional items can be added to your task list in the form of "To Do" items. These can act as reminders for yourself or to inform or remind any other 25Live user. An email notification will be sent automatically. If you are on the **Tasks** page, there is a button to **Create a "To Do" Task**, or the option can be found in **More Actions > Create a "To Do" Task**.

The screenshot shows the Cornell University 25Live Pro interface. At the top, there's a navigation bar with '25Live Pro', 'Event Form', 'Tasks', and 'Thomas Boggess'. Below this, there's a 'Select Object' dropdown set to 'Tasks' and an 'Outstanding' filter. A 'Reset' button and a 'Search' button are visible. At the bottom right, the 'Create "To Do" Task' button is circled in blue.

The 'Create "To Do" Task' modal form is shown. It includes fields for 'Task Name' (filled with 'Contact Aryn re: Loc Security'), 'Comment' (filled with 'Before copy PROD to TEST'), 'Assigned By' (Boggess, Thomas), and 'Due Date' (Wed Jan 22 2020). There are 'Cancel' and 'Create' buttons at the bottom right. A blue arrow points from the 'Create' button to the success message in the next screenshot.

The success message modal is displayed, stating 'Success! Your "To Do" Task has been created.' and providing a 'Create Another "To Do" Task' button and a 'Close' button. A blue arrow points from the 'Create' button in the previous screenshot to this success message.

The screenshot shows the 'Outstanding' task list. A table lists tasks with columns: Event, Title, Task Item, Type, Status, Actions, Respond By, First Date, Reference, Assigned By, Assigned To, and Scheduler. The task 'Contact Aryn re: Loc Security' is highlighted with a blue arrow.

Event	Title	Task Item	Type	Status	Actions	Respond By	First Date	Reference	Assigned By	Assigned To	Scheduler
Aryn's Event	Apostrophe Test	ADW109	Assign	In Progress	Assign, Deny	Mon Dec 23 2019	Mon Dec 23 2019	2019-AACKBW	Taylor, Aryn	You	Taylor, Aryn
none		Contact Aryn re: Loc Security	To Do	In Progress	Complete, Ignore	Wed Jan 22 2020			Boggess, Thomas	You	

To see to do items with a Respond By date beyond 30 days, you will need to create a search. To see the Advanced Task Search button, click on "Reset"

The screenshot shows the search options at the bottom of the task list. It includes a 'Select Object' dropdown set to 'Tasks', a 'Saved Searches (optional)' dropdown, and a 'Quick Search' toggle switch. Below this is a 'Search Tasks' input field and a 'Reset' button, which is highlighted with a blue arrow.

Activity 8A

1. Create a set of three events that you would like to relate. Save a search that lists all the related events in this set.
2. Copy the related set in 1. to a new related set and change the dates, times and locations.
 - What kinds of events would benefit from a copied related set?
3. Create a reminder to check on an event a week before it is scheduled to start
